SKILLS

LANGUAGES

Java • Python • JavaScript

C/C++ • SQL

FRAMEWORKS

Spring Boot • React.Js

Node.js • Tailwind CSS

CLOUD & TOOLS

AWS (EC2, S3, VPC)

Docker • Git • Kafka

Prometheus • Ollama

EXPERTISE

Data Structures (DSA)

System Design (LLD)

RESTful API Design

Database Management

CERTIFICATIONS

AWS Cloud Practitioner

(In-Progress)

COURSEWORK

CORE CS

Operating Systems

Computer Networks

DBMS

Cloud Computing

SUMMARY

Backend-focused full-stack developer and 3rd-year CS student at VIT Bhopal with hands-on experience building distributed systems, AI-integrated applications, and cloud-deployed services. Proficient in Java, Spring Boot, and Python; seeking software engineering internship opportunities for Summer 2026.

PROJECTS

FINANCE MANAGER AI | FULL STACK AI PLATFORM

Jan 2025 – Mar 2025

- Developed a financial dashboard utilizing **Spring Boot** and **React**; integrated **Chart.js** to visualize spending trends for 100+ simulated transactions.
- Implemented a local **Ollama LLM** instance to automate expense categorization with **90%+** accuracy, providing context-aware financial advice.
- Built secure **JWT-based Auth** and optimized **MySQL** queries, reducing data retrieval latency by **25%** through efficient indexing.

WEBSOCKET MESSAGE BROKER | DISTRIBUTED SYSTEMS

Oct 2024 – Dec 2024

- Engineered a real-time chat engine using **Spring Boot Microservices** and **WebSockets**, supporting 50+ concurrent bi-directional connections.
- Integrated **Apache Kafka** as a message broker to decouple services and ensure fault-tolerant message delivery.
- Configured **Prometheus & Actuator** for real-time monitoring; implemented **Bucket4j** rate limiting to maintain **99.9%** uptime.

LECTURE-BRAIN | AI-POWERED KNOWLEDGE BASE

Jul 2024 – Sep 2024

- Developed a productivity tool using **OpenAI Whisper** for high-fidelity audio transcription supporting 90+ languages.
- Built a **RAG (Retrieval-Augmented Generation)** pipeline with local embeddings for semantic search across lecture notes, eliminating internet dependency.
- Designed a modular **Python** backend to process multi-format audio files, reducing manual note-taking effort by approximately **70%**.

BIOMETRIC BLOOD DETECTION | DEEP LEARNING

Apr 2024 – Jun 2024

- Architected a **CNN-based** classification model using **TensorFlow** to predict blood groups from fingerprint patterns with **92%** validation accuracy.
- Enhanced model performance via advanced **image preprocessing** (Gaussian Blur, adaptive thresholding) to improve biometric feature extraction quality.

ACHIEVEMENTS

- 500+ Problems Solved:** LeetCode Top 16% – consistent daily problem-solving across arrays, graphs, and dynamic programming.
- AWS Infrastructure:** Successfully deployed custom VPCs, subnets, and EC2 instances; currently preparing for the AWS Cloud Practitioner exam.
- Competitive Programming:** Ranked in the top tier of university-level coding contests at VIT Bhopal.
