SKILLS

PROGRAMMING

Java • JavaScript • Python

DEVELOPMENT

ReactJs • Spring Boot •
MongoDB
MySQL • HTML • CSS •
Tailwind

EXPERTISE

Full Stack Development
Database Design
DSA

FAMILIAR

Git • Web Hosting • AWS

COURSEWORK

CURRICULUM

DSA
DBMS
Computer Networks
Operating Systems
Cloud Computing

HOBBIES

Travelling • Gaming

PROJECTS

FINANCE MANAGER AI | FULL STACK + AI INTEGRATION

- Developed a full-stack financial dashboard using **Spring Boot** and **React**, featuring data visualization with **Charts.js** and a responsive **Tailwind CSS** UI.
- Integrated a local **Ollama LLM** instance to provide AI-driven auto-categorization of expenses and personalized financial advice based on user spending patterns.
- Engineered a secure **JWT-based authentication** system and RESTful APIs to manage income/expense transactions with role-based access control.
- Leveraged **MySQL** for relational data persistence, ensuring efficient storage, retrieval, and categorization of high-volume financial records.

WEBSOCKET MESSAGE BROKER | MICROSERVICES + REAL-TIME MESSAGING

- Architected a high-concurrency messaging system using **Spring Boot** **Microservices** and **WebSockets (STOMP)** for low-latency, bi-directional communication.
- Integrated **Apache Kafka** as a distributed message backbone and **Spring Actuator/Prometheus** for real-time health and metrics monitoring.
- Implemented **Spring Security** with **JWT** for secure channel access, combined with **Rate Limiting** to ensure system stability under high load.
- Developed a modern **React** frontend with **Tailwind CSS**, featuring real-time message delivery and active user presence tracking.

FINGERPRINT BLOOD GROUP DETECTION | DEEP LEARNING & BIOMETRICS

- Developed an innovative biometric system using **Deep Learning (CNN architectures)** to classify blood groups from fingerprint images.
- Utilized **TensorFlow** and **Keras** to analyze ridge patterns for **ABO and Rh factor** prediction with high classification accuracy.
- Built a complete **Python** pipeline for image pre-processing, feature extraction, and model evaluation to facilitate non-invasive medical diagnostics.

E-MEDICAL SYSTEM | FULL STACK DEVELOPMENT

- Built a comprehensive medical platform using **React** and **Tailwind CSS** for a modern user experience and responsive design.
- Architected the backend with **Spring Boot** and **Spring Security**, implementing role-based access control for patients and doctors.
- Designed and optimized **Database Schemas** to manage complex medical records, digital prescriptions, and appointment scheduling.

AWARDS & ACHIEVEMENTS

- Solved **500+** DSA problems on platforms like LeetCode and GFG within the past year.
- Actively participated in **20+** coding contests, demonstrating consistent problem-solving skills under time pressure.
